EUROPEAN ASSOCIATION OF HOTEL AND TOURISM SCHOOLS

COOKING Quiz: What is this?

The Cooking Quiz Educational Competition is a proven project now in its 8th edition.

It involves over 100 schools and 26,000 students in Italy every year and is considered one of the most innovative projects for Hotel Management Institutes.

Students are provided with important concepts and information with the aim of later assessing their level of learning through gamification. There are individual challenges to achieve the highest score in one's school, as well as competitions between classes to determine the group that will advance to the next phase, namely the National Final in May. The competition's objective is to stimulate learning through innovative teaching techniques, using technological tools close to the digital-native generations.

PARTICIPATION IS FREE!

COOKING Quiz: Goals

With Cooking Quiz, students will have the opportunity to immerse themselves in a highly educational experience, thanks to the lessons provided by the renowned Chefs of the **Italian Federation of Chefs (F.I.C.)**.

F.I.C., a reference point in the Italian culinary landscape, represents excellence in the national gastronomic sector. The skills and experience of its Chefs are internationally recognized, and now, through Cooking Quiz, students will have the opportunity to access this extraordinary heritage of culinary knowledge. We will further explore the crucial role played by F.I.C. in promoting Italian cuisine and culinary education, highlighting the extraordinary resources that this federation makes available for the growth and development of future chefs.

COOKING Quiz Digital

FIRST PHASE

The 4th-year classes specializing in enogastronomy, sales, and pastry/bakery will be involved in specific appointments to offer students a tailored lesson for their field of study. Students can remain in their own classrooms, if equipped with interactive whiteboards or smart TVs, or gather in the auditorium.

The Peaktime staff, along with the F.I.C. teacher/chef and trainer Alvin Crescini, will connect live with the school. The trainer will introduce the project to the students, addressing topics such as healthy and proper nutrition, promotion of local gastronomic excellence, combating food waste, and proper methods of recycling, followed by the lesson from the F.I.C. teacher/chef, covering a topic related to the students' study plan, supported by videos and slides. It is a dynamic lesson designed specifically to capture the attention of students online.

SECOND PHASE:

After the lesson, we move on to the verification phase through EDUTAINMENT! Each student will be the protagonist! They can use their smartphones as a keypad to answer the proposed questions. The result of each student will contribute to the score of their class. At the end, an individual ranking and a class ranking will be drawn up. The top-ranked individual will be awarded a €20 voucher for online purchases. The class with the highest score for each study program will advance to the NATIONAL GRAND FINAL scheduled for May 2024.

COOKING Quiz

The Final is a major in-person event scheduled for May 2024, where the top classes from each Hotel Management Institute and from each study program that participated in either version of the Cooking Quiz will compete to obtain the title of...

COOKING QUIZ CHAMPION 2024

Peaktime has been involved in the transfer of values and knowledge and effective communication with young people and families for over 15 years. Our passion is to transform learning into an engaging adventure through innovative engagement methodologies.

We believe that education can be enjoyable and meaningful; that's why we design and develop educational communication and training paths to engage and inspire students of all ages. Speaking to young people means conveying values and skills to enable them to become active players in shaping the future.

With Cooking Quiz, we demonstrate how the transfer of fundamental themes (healthy and proper nutrition, promotion of local gastronomic excellence, combating food waste, proper methods of waste separation, etc.) can be exciting, engaging, and at the same time highly educational.

For 15 years, we have been connecting schools with institutions and companies to design and implement educational programs that create value using innovative and high-performance formats. We educate through fun!
