

# Sustainable Gastronomy Tourism "Actions After 2030"

AEHT Youth Parliament | Riga, Latvia

7. - 11. April, 2026

RIGA TECHNICAL SCHOOL OF  
TOURISM AND CREATIVE INDUSTRY

## Invitation to Participate AEHT Youth Parliament 2026

Sustainable Gastronomy Tourism – “Actions After 2030”

Riga, Latvia | 7–11 April

**Dear AEHT Member Schools,**

**Riga Technical School of Tourism and Creative Industry (RTRIT)** is pleased to invite students from AEHT member schools to participate in the AEHT Youth Parliament, which will take place in Riga, Latvia, **from 7 to 11 April, 2026.**

This international youth event brings together motivated young people to explore the future of sustainable gastronomy tourism, focusing on concrete actions and responsibilities beyond the 2030 Sustainable Development Goals.

Through a simulated Youth Parliament format, participants will engage in debates, workshops, case studies, and collaborative problem-solving activities that strengthen critical thinking, diplomacy, leadership, and international communication skills.

**Arrival: Tuesday, April 7<sup>th</sup> 2026**

**Departure: Saturday, April 11<sup>th</sup> 2026**

# Sustainable Gastronomy Tourism "Actions After 2030"

AEHT Youth Parliament | Riga, Latvia

7. - 11. April, 2026

## Participants

### Students

We wish to enable the arrival of as many countries as possible, so the limit is two students per country (one per school), with a maximum of 30 students. Students shall be 18 years old at the time of travel.

Active participation in debates is required, so the level of English must be at least B2. The participating students will be required to research the topic of the discussion and develop solutions to significant issues identified.

## General Theme

### Sustainable Gastronomy Tourism – “Actions After 2030”

Participants will critically assess current sustainability practices and explore how tourism, food systems, mobility, branding, and consumption patterns must evolve in the coming decades.

#### General Topics for Debating

#1 "Waste Is Not Just Trash – It's Tomorrow"

#2 "Next-Gen Traveller Choices – Can going green still be FUN?"

#3 "Green Travel Hype – Cool Trends or Real Change?"

# Sustainable Gastronomy Tourism "Actions After 2030"

AEHT Youth Parliament | Riga, Latvia

7. - 11. April, 2026

## Assignment

# Analytical Assessment of Sustainable Development Goals Toward 2030

Participants will critically assess current sustainability practices and explore how tourism, food systems, mobility, branding, and consumption patterns must evolve in the coming decades.

## Objective

The purpose of this assignment is to critically evaluate global progress toward selected Sustainable Development Goals (SDGs) by 2030. Students are expected to move beyond declarative sustainability narratives and assess how these goals are implemented in practice. Particular attention should be paid to Responsible Consumption and Production, Sustainable Tourism, and Affordable and Clean Energy, while allowing analytical flexibility in the selection of additional goals.

## Analytical Task

Despite broad political and institutional endorsement, the implementation of the Sustainable Development Goals remains uneven and contested. Structural, economic, social, and technological constraints continue to challenge their realization.

Students are required to address **three** Sustainable Development Goals:

- ***Responsible Consumption and Production***
- ***Climate Action***
- ***Affordable and Clean Energy***

and analyze whether these goals are realistically achievable by 2030

The written analysis must be evidence-based and may draw on statistical data, policy documents, academic literature, or case examples. The emphasis should be on identifying discrepancies between ambition and actual implementation rather than reiterating official policy statements.

## Central Question

If by 2030 certain Sustainable Development Goals are achieved only formally — or not achieved at all — what are the main reasons for this outcome?

In addressing this question, students should consider political and economic limitations, consumption and production patterns, technological capacity and accessibility, and global inequalities that influence sustainable development outcomes.

## Post-2030 Perspective

The final section of the assignment should provide a brief forward-looking reflection. Students are expected to outline their vision of sustainable development beyond 2030, identify potential new priorities or innovations, and critically assess whether the current SDG framework remains sufficient to address future global challenges.

AEHT Youth Parliament | Riga, Latvia

7. - 11. April, 2026

## Assignment

## Submission Requirements

### Written Report

Students must submit a written analytical report that:

- does not exceed 1.5 pages,
- is formatted in 12 pt Times New Roman,
- uses 6 pt spacing between lines,
- is fully justified,
- follows academic writing standards.

### Visual Submission (PDF Slide)

In addition to the written report, students must submit one-page PDF (landscape format) containing a visual illustration of the country, policy, or thematic context discussed in the assignment.

The slide should:

- visually represent the country's "personality" or sustainability profile,
- highlight the key topic or challenge discussed,
- combine minimal text with images, icons, graphs, or diagrams,
- serve as a supporting visual for the pitch talk presentation.

### Presentation Format: 2-Minute Pitch Talk

The results of the assignment will be presented on the first debate day in the form of a 2-minute pitch talk. The presentation should be concise, analytical, and structured around one core argument, one critical insight, and one future-oriented idea.

### Concluding Remark

Sustainable development is not merely about compliance with predefined goals but about transformation, responsibility, and long-term progress. Each generation's decisions shape the sustainability pathways available to the next.
